

coltosol[®] F

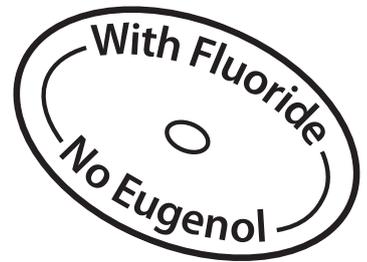

Temporary Fillingmaterial

Economical & reliable

coltosol® F

Simple Application, reliable effect

Easy application

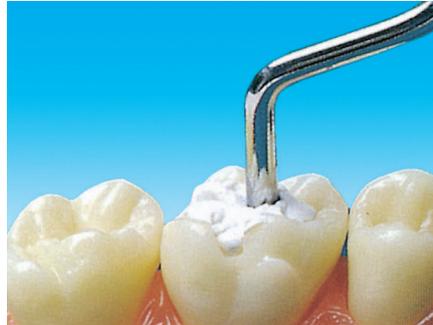

- Creamy consistency for easy adaptation in the cavity
- Good retention in the cavity
- No mixing, no waste of material
- Simple setting by the action of saliva
- Easy removal in large portions
- Long shelf life

Reliable Security

- Fluoride release
- Radiopacity for the perfect control of the treatment result
- Perfect marginal seal
- Eugenol-free, no effect on the curing of composites
- Ideal surface hardness for provisional fillings in posteriors as well as for root canal sealings

The choice is yours

The required quantity of Coltosol F is either dosed with the syringe or taken directly from the glass jar with an instrument. Quick, easy and clean.

Instant Application

After rolling the dispensed Coltosol F into a ball with your fingers, simply press it into the prepared cavity.

Easy removal

Coltosol F can be easily removed in large pieces using a bur or an excavator without leaving any residues.

Economical: Optimal value for money
