

AHTemp™

Calcium Hydroxide-Based Root Canal Dressing

- Direct and Precise Application into the Root Canal
- Reduced Desiccation
- Proven Compatibility with AH Plus

For better dentistry

DENTSPLY

AH Temp™ combines the effective disinfection of root canals with easy handling due to the convenient AH Temp™ Cannulas.

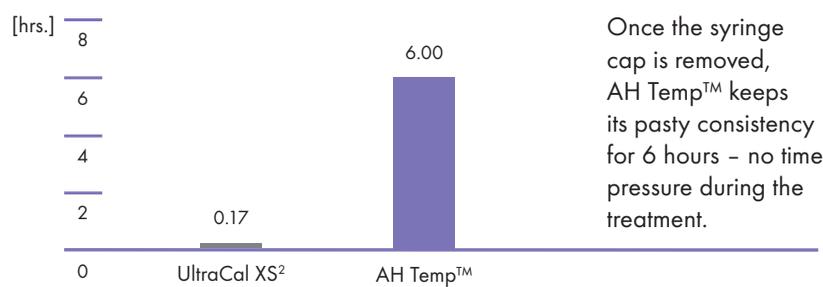

The aim of Endodontic Treatments: Effective Disinfection of Root Canals

AH Temp™ is a highly alkaline paste with a pH level of 12 based on calcium hydroxide which is known for its antibacterial effect.

Reduced Desiccation

- ✓ Less blocking of cannulas during application
- ✓ Less blocking of syringes over time
- ✓ Less waste of desiccated syringes

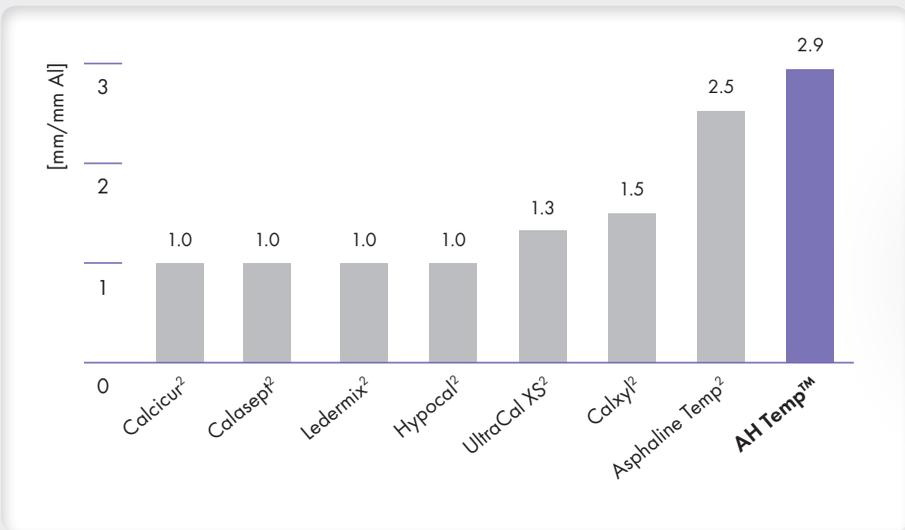

Stable Consistency during Chairside Use¹

In the daily routine, AH Temp™ is usable for 3 months

Excellent Radiopacity enables reliable X-ray Control¹

Direct and Precise Application into the Root Canal

Angulation 45°

Working length 25 mm

External diameter 0.41 mm

"The application of AH Temp™ is brilliant – it is the best root canal dressing available at the moment. In addition, it is supplied with an excellent cannula!"

Dr. Matthias J. Roggendorf,
University of Marburg, Germany

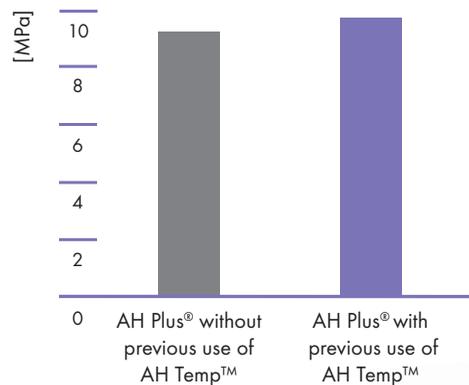

AH Temp™ Cannula

Calxyl² Cannula

Proven Compatibility with AH Plus

Consistent High Bond Strength of AH Plus on Dentin¹

AH Temp™ is compatible with AH Plus® – the ideal combination of root canal dressing and definite root canal sealer.

Proven consistent performance of AH Plus® after the removal of AH Temp™ from the root canal.

¹ M. Roggendorf, 2012, proven for application of AH Temp™ and AH Plus® Sealer, data on file.
